Week 01

Installing and using a cybersecurity tool

INTRODUCTION

As part of our efforts to enhance our company's cybersecurity, we recently faced a network intrusion attempt. To better prevent such attacks in the future, we decided to install an intrusion detection tool. After careful selection, we deployed and configured it to actively monitor our network. With this tool, we can quickly detect suspicious activities and take immediate action to safeguard our sensitive systems and data. By sharing our experiences with colleagues, we're strengthening the security culture across the entire company.

Target skills

- Discovering a cybersecurity tool.
- Learning to use the tool for a specific task.
- Writing a usage tutorial for the tool

THE PROJECT

Step 1: Choosing the Cybersecurity Tool

- What are the most common cybersecurity tools?
- Which tool would be best suited for our study?

Step 2 : Installing the tool

- What are the necessary steps to install the tool correctly on our systems?
- What are the technical prerequisites and required configurations for a successful installation?

Step 3: Configuring the tool

- What are the key features of the tool, and how can we configure them to meet our needs?
- How can we customize the tool's settings to optimize its effectiveness?

Step 4: Using the tool

- What are the main use cases of the cybersecurity tool?
- How can we use the tool to detect and prevent potential threats?

Step 5: Result analysis

- How to interpret the results and reports generated by the tool?

Step 6 : Maintenance and updates

- What are the best practices for regularly maintaining and updating the tool?
- How can we ensure operational continuity and security of our environment during updates?

Delivery

Your presentation delivery support must contain:

- A clear and detailed presentation of the installed tool
- Un full tutorial on how to install the tool
- A practical example of how to use the tool
- Interpreting the results of the case study

Bonus

Create a video tutorial on how to use the tool

Ressources

- Example of FTK installation
